2. Onkar Krushna Vyavhare   (2019BCS035) (A_18)
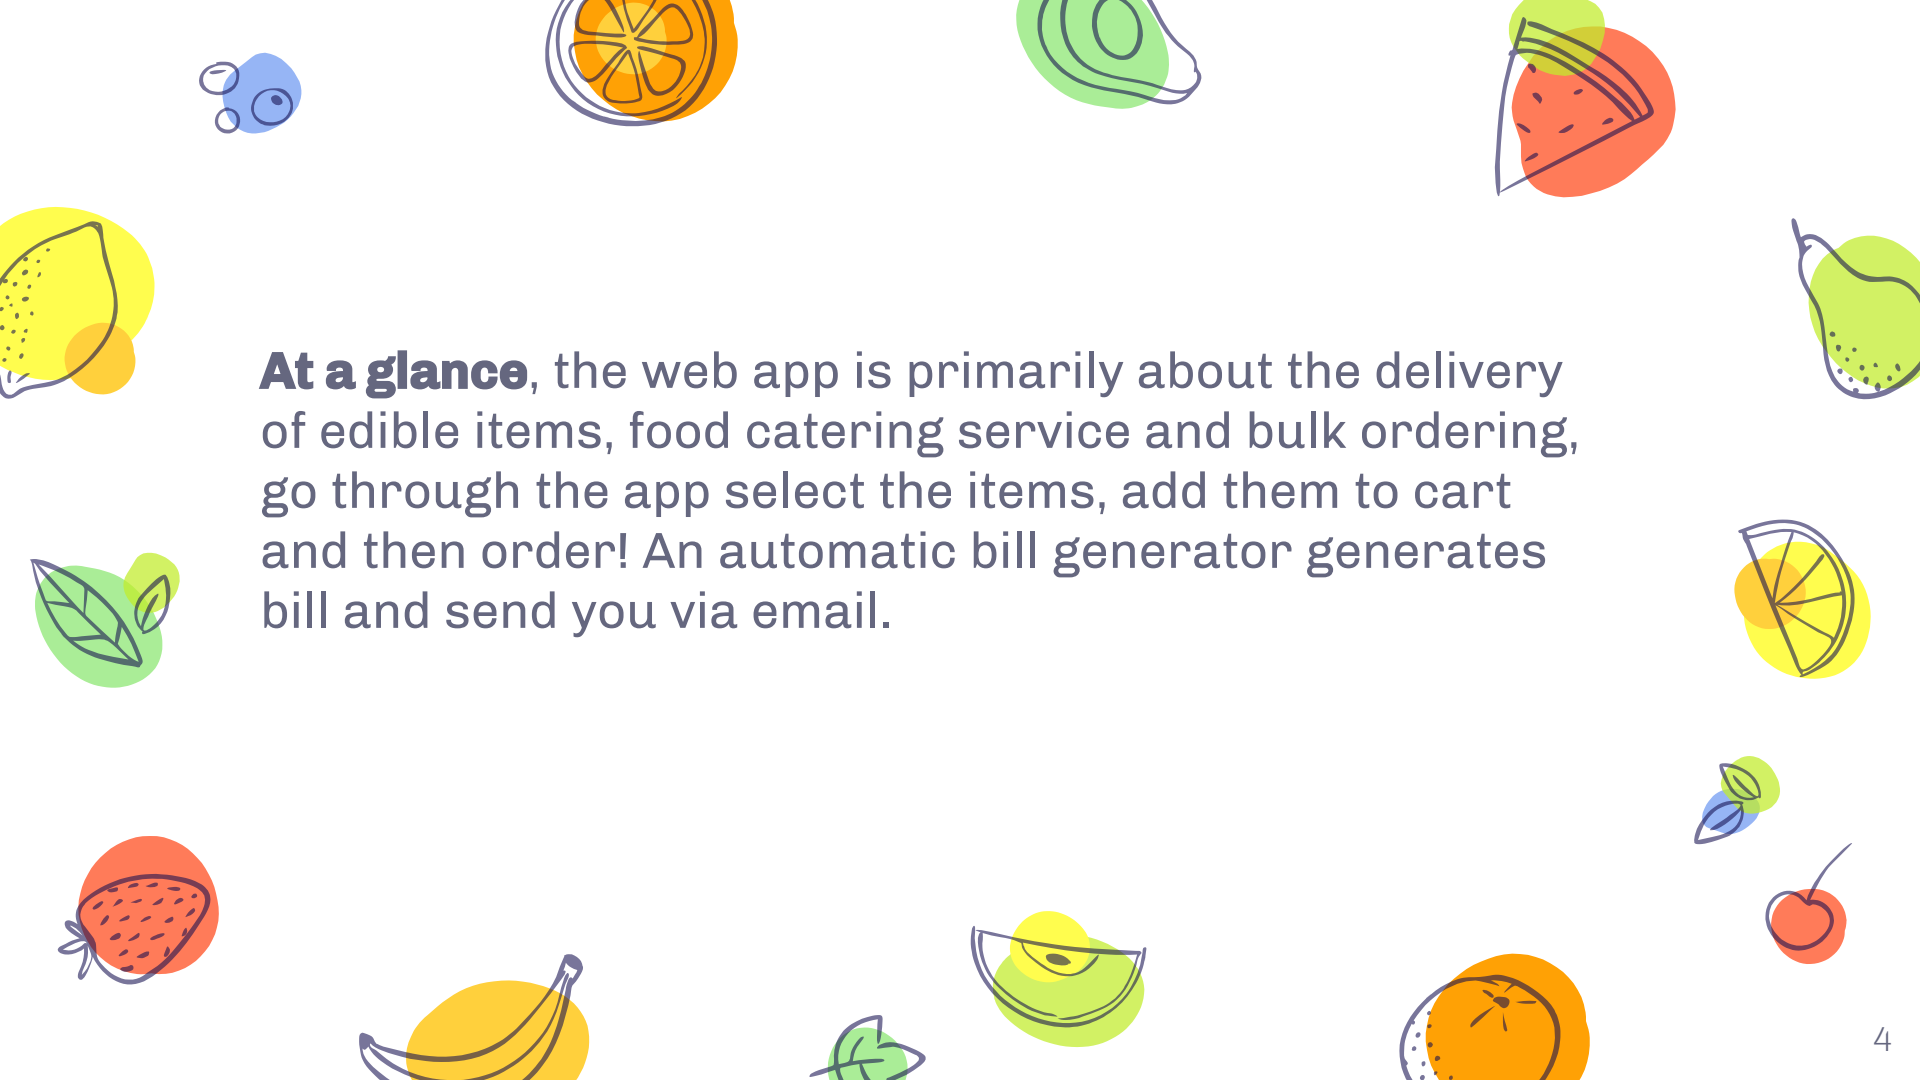

3. Sanket Ramesh Ghormode   (2019BCS077) (A_38)

Under the guidance of :

Prof. Jaishri Waghmare

Introduction

We as a team tries to implement the basic CRUD operating app, as mentioned by Jaishri Waghmare madam, we used the industry driven technologies to build our web app.

At a glance, the web app is primarily about the delivery of edible items, food catering service and bulk ordering, go through the app select the items, add them to cart and then order! An automatic bill generator generates bill and send you via email.

But profoundly what **Foodies** is all about:

The **home** page of the app, consisting different nav tabs like service, contact us and to do payment.

By clicking **order now** we will get the next section ...
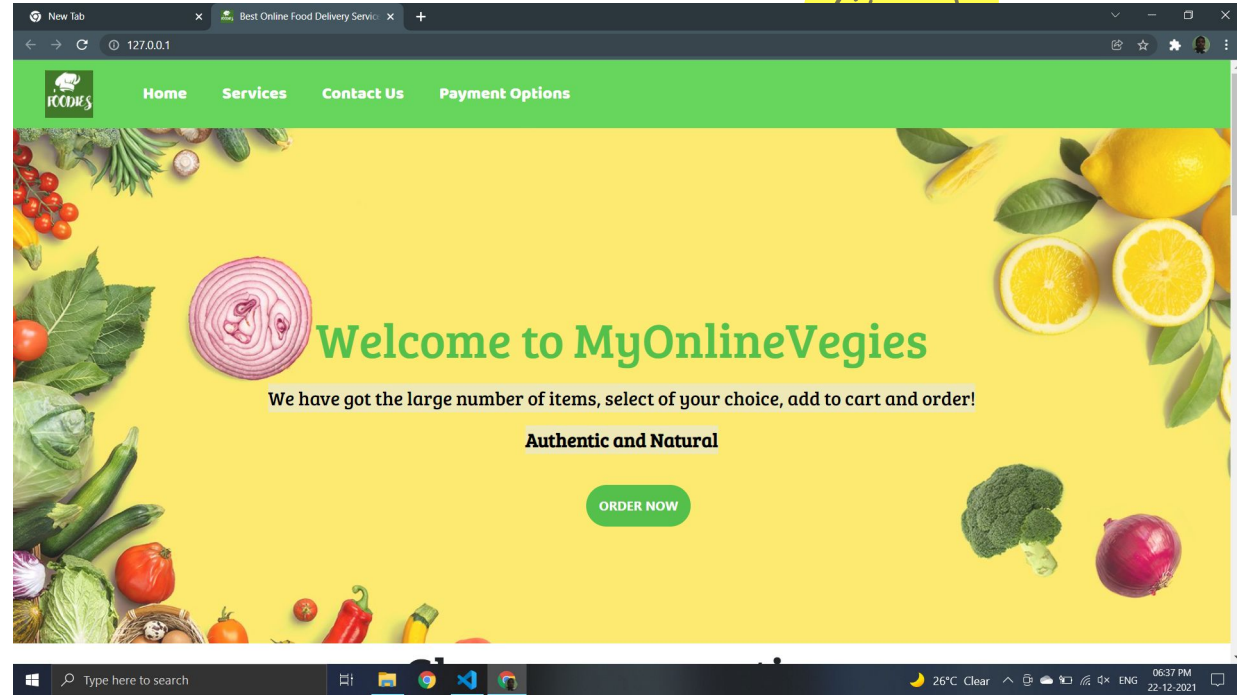

Instead of messing all items together we put them in their respective categories like, **grocery**, **fruits**, etc.
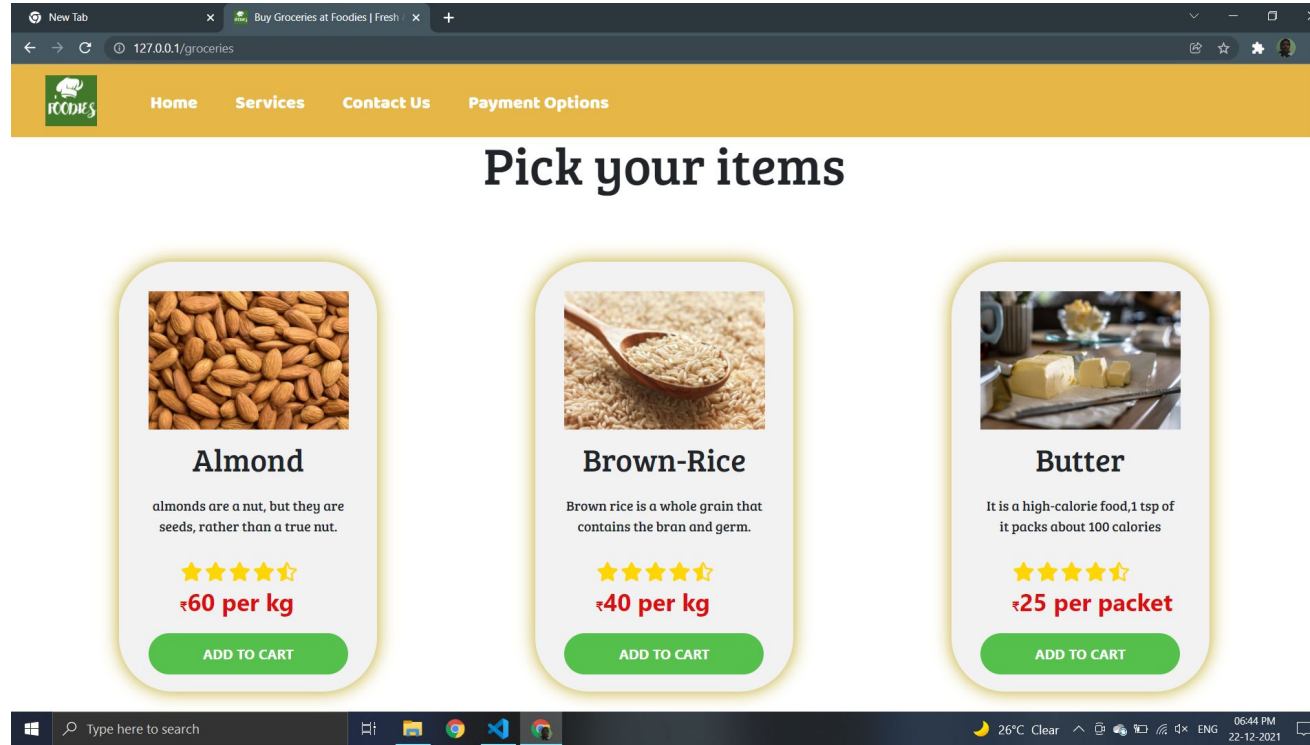

Click on the category and you will get the list of items we have in our service.
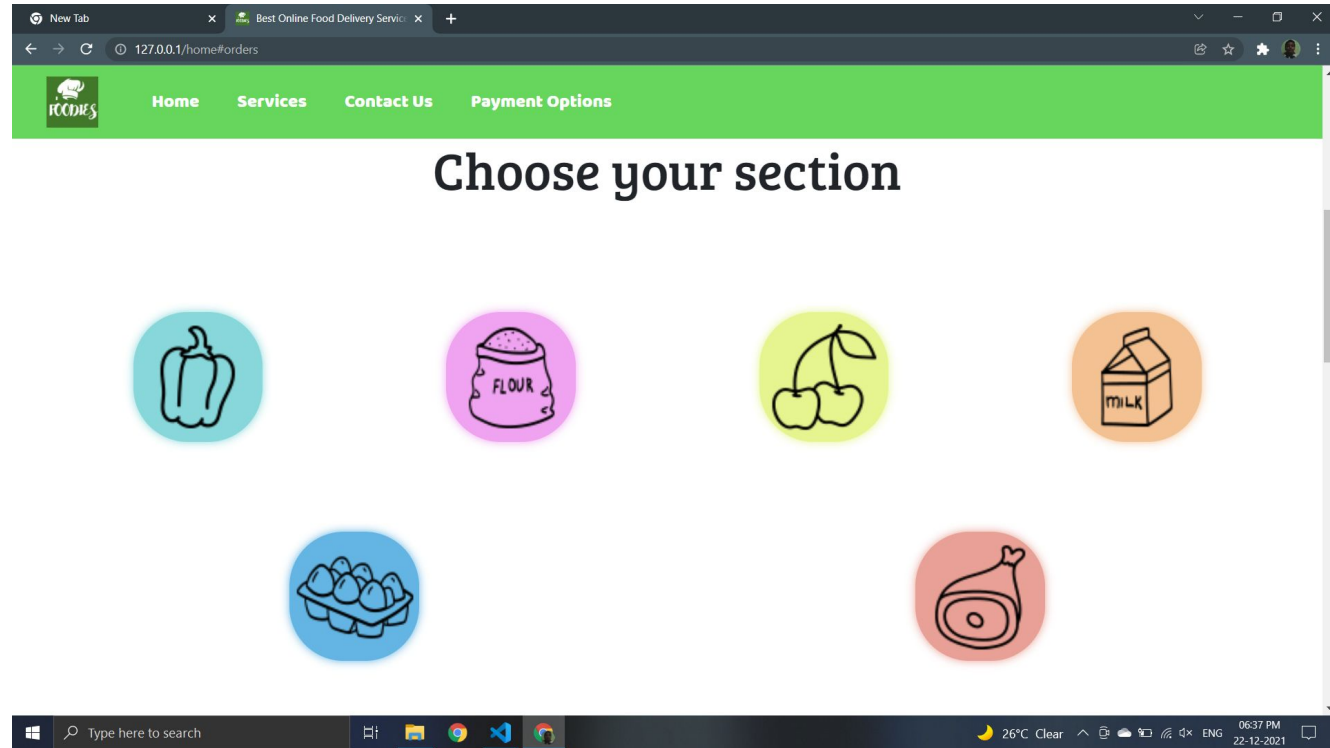

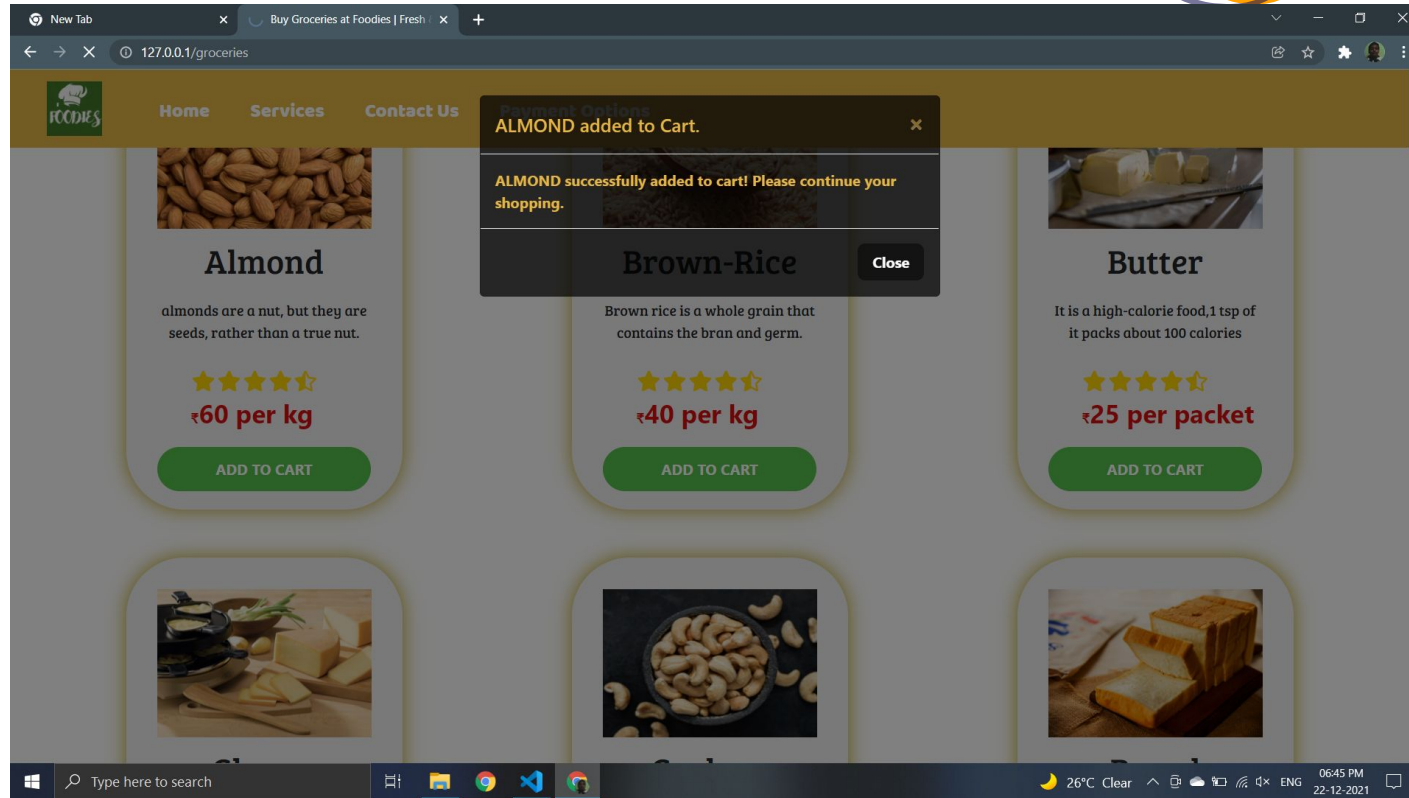

This is how the **groceries** section looks like!

We have got the image, name, description, rating and the price for each item.

If you are looking to buy something just add it to your cart, and you will get this popup…

Pick your items

Almond

almonds are a nut, but they are seeds, rather than a true nut.

★★★★½

₹60 per kg

ADD TO CART

Brown-Rice

Brown rice is a whole grain that contains the bran and germ.

★★★★½

₹40 per kg

ADD TO CART

Butter

It is a high-calorie food,1 tsp of it packs about 100 calories

★★★★½

₹25 per packet

ADD TO CART

The user will get the instantaneous popup
Of what item it added to cart! Like in this picture

If you are done with your shopping, click the payment options tab on the nav bar and you will get this page, here you can see the items in the cart section, it has the list of items you have added to cart and show you the total bill you have to pay.

Just fill the correct credentials and click on pay now and you are good to go!

Payment Form

Tomatoes are the major dietary source of the antioxidant lycopene.

★★★★⯪

₹80 per kg

ADD TO CART

Peas

Peas are a good source of vitamins C and E, zinc, and other antioxidants.

★★★★⯪

₹40 per kg

ADD TO CART

The Lighthouse Report:

The lighthouse report is the best method to know overall performance of the app.Each lighthouse has five categories: performance, accessibility, best practices, SEO, and progressive web-app

What is the metrics—
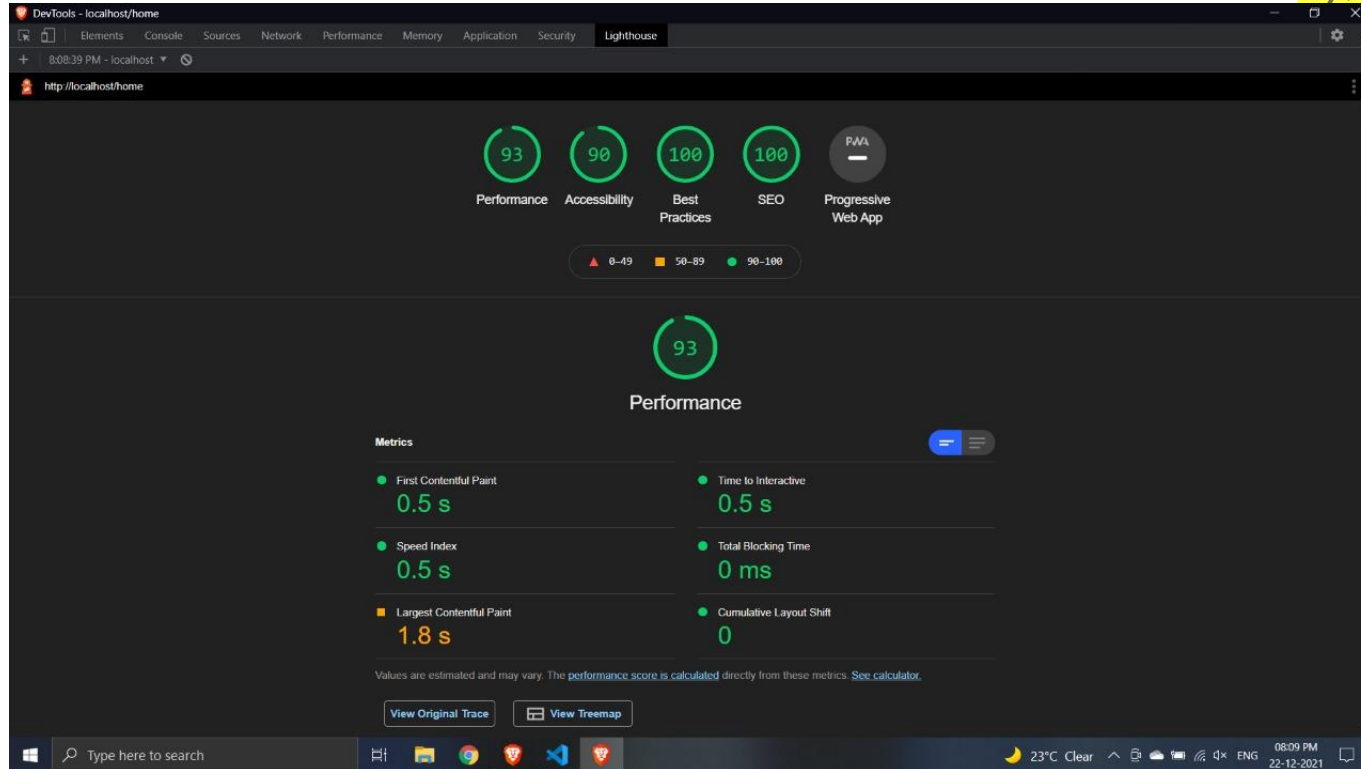

How scores are color-coded

The metrics scores and the perf score are colored according to these ranges:

- 0 to 49 (red): Poor

- 50 to 89 (orange): Needs Improvement

- 90 to 100 (green): Good

And what's the report of our web-app :-

So that's it from our side, we tried to implement the CRUD and have made the fully-fletched web-app, communicating with both server and database!

Hope this project will make you happy and satisfied.

To know more about the project, we have made a video tutorial (drive-link). You can go and watch it and with that we have attached the github link of this project too!
